

BIOQUELL HPV DECONTAMINATION RECORD

FACILITY

Check Racks	CHEMICAL INDICATOR	BIOLOGICAL INDICATOR			REVIEWED BY
	Record Highest Log Achieved (e.g., 2, 4 or 6-log)	18 HOUR Turbid/Clear	7 DAY Turbid/Clear	Final Status Pass/Fail	

Indicate room number and all locations that the chemical and biological indicators have been placed. Any indicator failure (i.e., CI = < 6-log reduction or BI turbidity) must be reported promptly to the Facility Manager and the decontamination cycle reevaluated. Facility Manager, or designee must periodically review results to ensure compliance with SOPs.
